

## Unisys Certification Request

In accordance with the Proposed P&P amendment for test certification document pp/05-09-04, Unisys is submitting the following items as specified in the document.

1. The precise version number (s) and OMG document number(s) of the OMG Available Specification(s) which the test suite is claimed to test, with a list of the compliance point(s) tested.
  - ?? Unified Modeling Language (UML) Specification: Infrastructure version 2.0 ptc/04-10-14
  - ?? Unified Modeling Language: Superstructure version 2.0 formal/05-07-04
  - ?? Unified Modeling Language: Diagram Interchange version 2.0 ptc/05-06-04
  - ?? MOF 2.0/XMI Mapping Specification, v2.1 formal/05-09-01

The required compliance point(s) will be performed as specified in the respective documents under the conformance section.

The testing scope will include only the XMI used in the import and export of UML.

2. A statement that a free license for the test software will be granted to any OMG Members that the relevant OMG Technology Committee appoints to the Testing Task Force (TTF) for at least the duration of that TTF. The request shall include a pro-forma copy of this license. The license shall explicitly grant TTF members the right to both execute the test suite and examine its source code, and shall not prevent TTF members from documenting the behavior of the test suite.

A Non-Disclosure Agreement (NDA) is enclosed for your review.

3. A cryptographic hash of a ZIP archive of the test suite using a cryptographic hash function SHA-1.

SHA-1 digests of ZIP archive: [8a4314e42e4199adc159508159482237e0750993](#)

4. A document contains the description of the content of the ZIP archive whose cryptographic hash appears above.
