MAKE SOFTWARE QUALITY YOUR MISSION:

The Consortium for IT Software Quality (CISQ) is an industry leadership group co-founded by the Object Management Group (OMG) and Software Engineering Institute (SEI) at Carnegie Mellon University to create standards for automating the measurement of software size, quality characteristics, and related measures from source code. CISQ members are IT executives and senior leaders from the Global 2000, system integrators, outsourced service providers, and software technology vendors. Members have joined CISQ from hundreds of public/private organizations to support these efforts, including the U.S. Federal Government, American Express, AT&T, Capital One, eBay, FedEx, Fidelity, Johnson & Johnson, Safeway and others.

Membership to CISQ is free. Visit www.it-cisq.org to learn more and sign up.

MEET CISQ DIRECTOR:

Dr. Bill Curtis
Sr. VP and Chief Scientist,
CAST Software, Co-author
of Capability Maturity
Model (CMM)

“CISQ will enable us to benchmark the effectiveness of internal development, evaluate the quality of applications acquired from external sources, and predict the quality and cost of IT services to the business. For application quality measurement to be economically practical it must be automated, and that requires a level of standardization that does not exist today.”

– Richard Soley, Chairman and CEO, OMG

THANK YOU CISQ SPONSORS:

Join CISQ at www.it-cisq.org. For more information, email info@it-cisq.org or call 781-444-0404.
CREATE CODE QUALITY STANDARDS:

IT organizations can use CISQ software quality measures to detect critical violations of good architectural and coding practice in software. Measure your software against CISQ specifications at every release, e.g., measure code compliance to secure architectures, and put CISQ measures into contracts with outside developers or software vendors.

Published Standards:

- Automated Function Points (AFP)
- Quality Characteristic Measures for Security, Reliability, Performance Efficiency, and Maintainability

These specifications have been adopted by OMG as formal standards.

Standards in Progress:

- Automated Enhancement Function Points (AEFP)
- Technical Debt
- Quality-Adjusted Productivity

For an overview of CISQ standards initiatives, visit www.it-cisq.org/standards.

Visit the CISQ website at www.it-cisq.org to become a member, access the specifications, read the blog, and register for events.

ATTENTION CISQ MEMBERS!

On October 13th we brief U.S. Federal Government on new quality measure standards.

Interested in Sponsorship? Take Advantage of These Benefits:

- Seat on the CISQ Governing Board
- Logo prominently placed on the CISQ website
- Logo on CISQ collateral, signage, and communications
- Demo/exhibit table and passes to CISQ events
- Hosting of sponsored webcasts
- Press release to announce sponsorship
- Media and speaking opportunities
- Targeted emails to CISQ membership

Sponsorship opportunities are available. To learn more, contact bd-team@omg.org or call 781-444-0404.

Join CISQ at www.it-cisq.org. For more information, email info@it-cisq.org or call 781-444-0404.
