# Team Process Design

- **The trend to centralized and integrated business process modeling leads to projects with a high number of models, modelers, users, and modeling purpose.**
- **Distributed process design often has two specific directions:**
  - Localization of a uniform process model
  - Globalization of a local best practice processes
- **Team Process Design requires among others:**
  - Shared understanding of design goals
  - Common knowledge of enterprise process architecture
  - Common methods for modeling and design
  - Shared tools and repositories for design artifacts
  - Shared understanding of process terminology (ontology)

# Process Modeling Project Issues - Framework
