

Modeling Processes Using BPMN

Petko Chobantonov (Lombardi Software)

What is the future of BPMN?

- **What should we include in BPMN for the next major version? How should BPMN look in the next 5 years?**
 - How can we help the companies manage their business more efficiently?
 - Problem Views – where should a business analysts concentrate their efforts
 - Control Views – Where are my control points in the process? Do we spent too much time controlling the business?
 - Customer Views – What interactions the customer sees from the business process

Multiple Diagrams in BPMN?

- **Currently there is only one diagram type in BPMN describing orchestrated processes.**
- **What other types of diagrams will be useful for business users?**
 - Collaboration Diagram?
 - Organization Structure Diagram?
- **How about presenting different views over the business**
- **How can we facilitate process changes?**

BPMN Future – Process Usage Map
