

# Modeling and Managing Web Services using BPEL

*A Technology Roundtable*

John Evdemon  
Architect  
Microsoft

# Approach

- Short discussion of issues
- Brainstorming
- “Magic” Form
- Break (10 min)
- Review

# For Your Consideration...

- What's missing for Modeling or Managing Web Services?
- BPEL is an orchestration language, not a choreography language.
- Perhaps we should have named it “BPL”?
- Extending BPEL
  - BPEL4People, BPEL for Sub-Processes, BPEL-J, BPXL, WS-\* txn semantics, and more
