3.2.2 ISO TC184 / SC02 – ROBOTICS -.

IEC/Standardization Management Board/Strategic Group 7, Electrotechnical Applications of Robotic Technologies was set up at SMB meeting 148, in October 2013

It includes activities from

IEC TC 61 Safety of household and similar electrical appliances

IEC TC 59 Performance of household and similar electrical appliances

IEC TC 59 Performance of household and similar electrical appliances

They have also invited ISO TC184/SC02/WG08 Convenor as a liaison representative to this group.

TC184/SC02 is discussing establishing a new WG for Modularity for Service Robots. OMG has RTC and also has an RFP process on Unified Component Model in Progress (with support from Robotics DTF), which is relevant to this activity.

If this new WG is established, the OMG needs to establish a liaison relationship with the WG, to ensure that their roadmap reflects the existence of Relevant OMG specifications for Robotics Modularity.
