The notion of the Reconfiguration

“An abstract process that is based on how to efficiently adapt, apply and upgrade the functionality, that an entity supports, to any expected or potential change/alteration of its state, situation and activity”

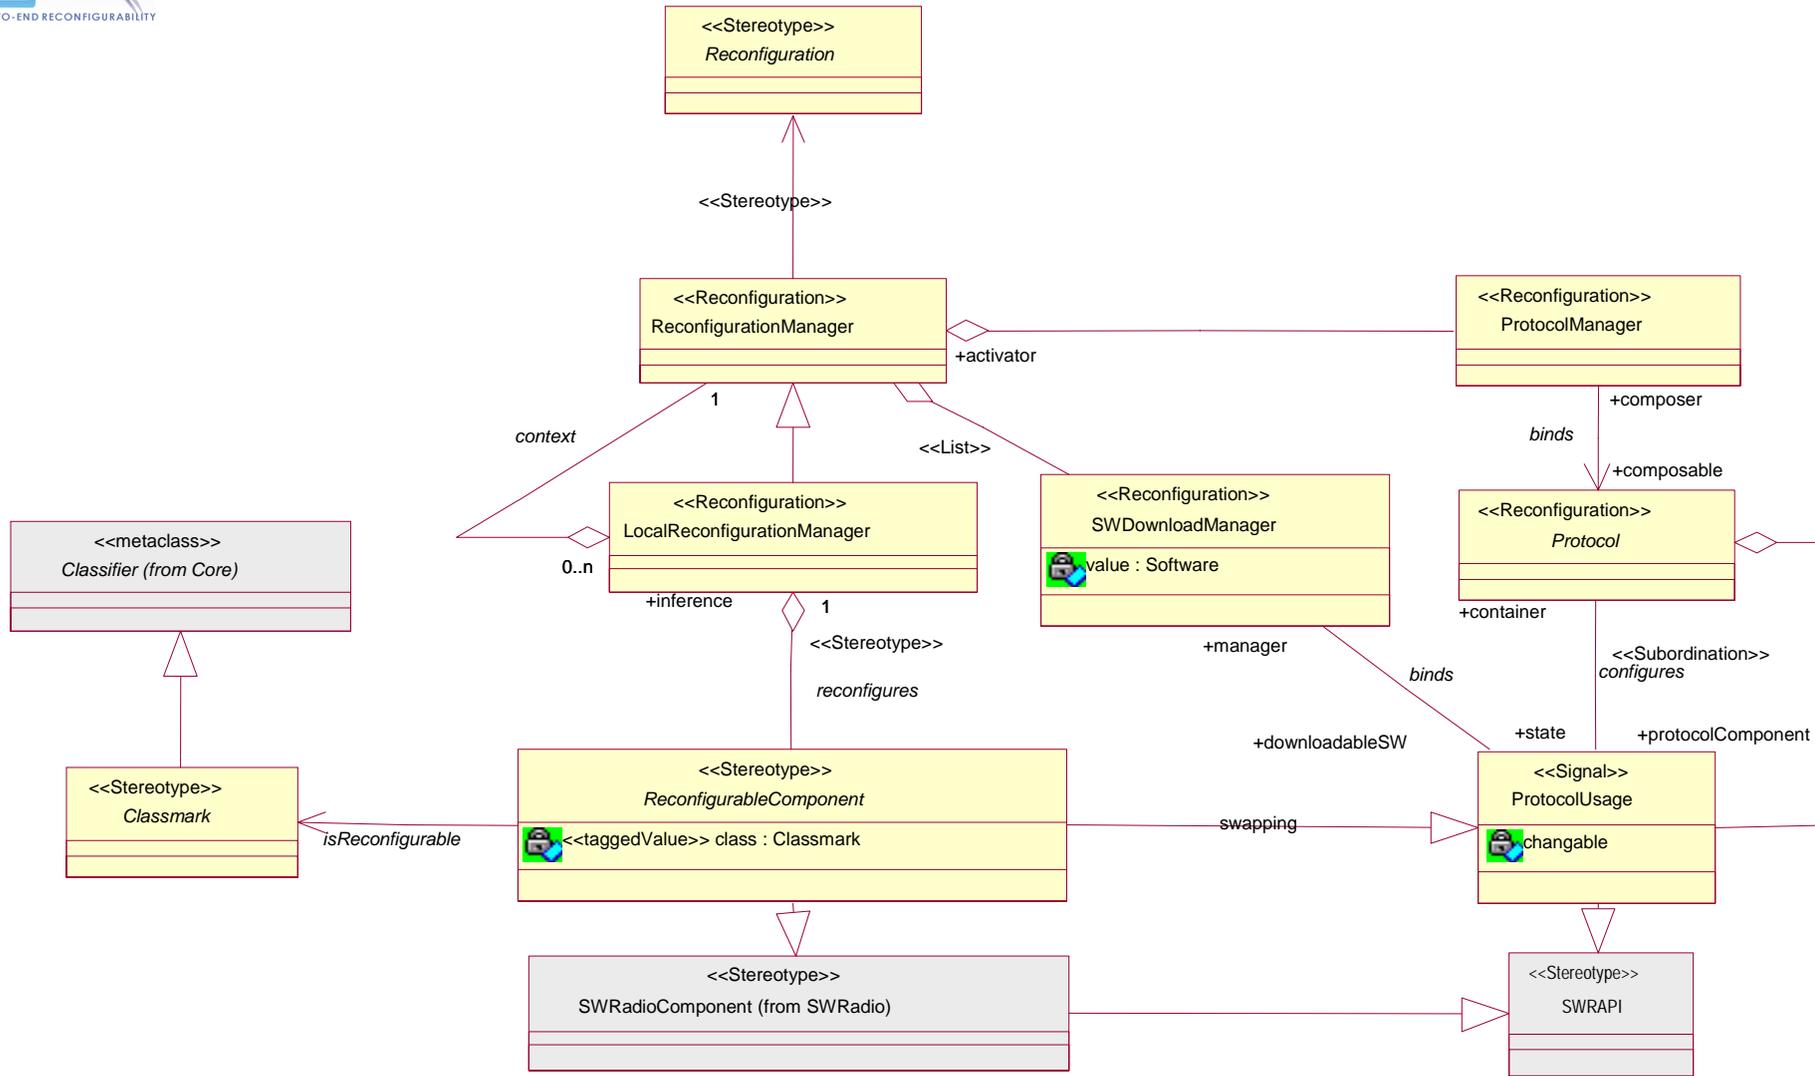

Service Provision Reference Model for Reconfiguration

- Service Adaptation
- Requirements

- Coordination between Operators
- Adaptable Service

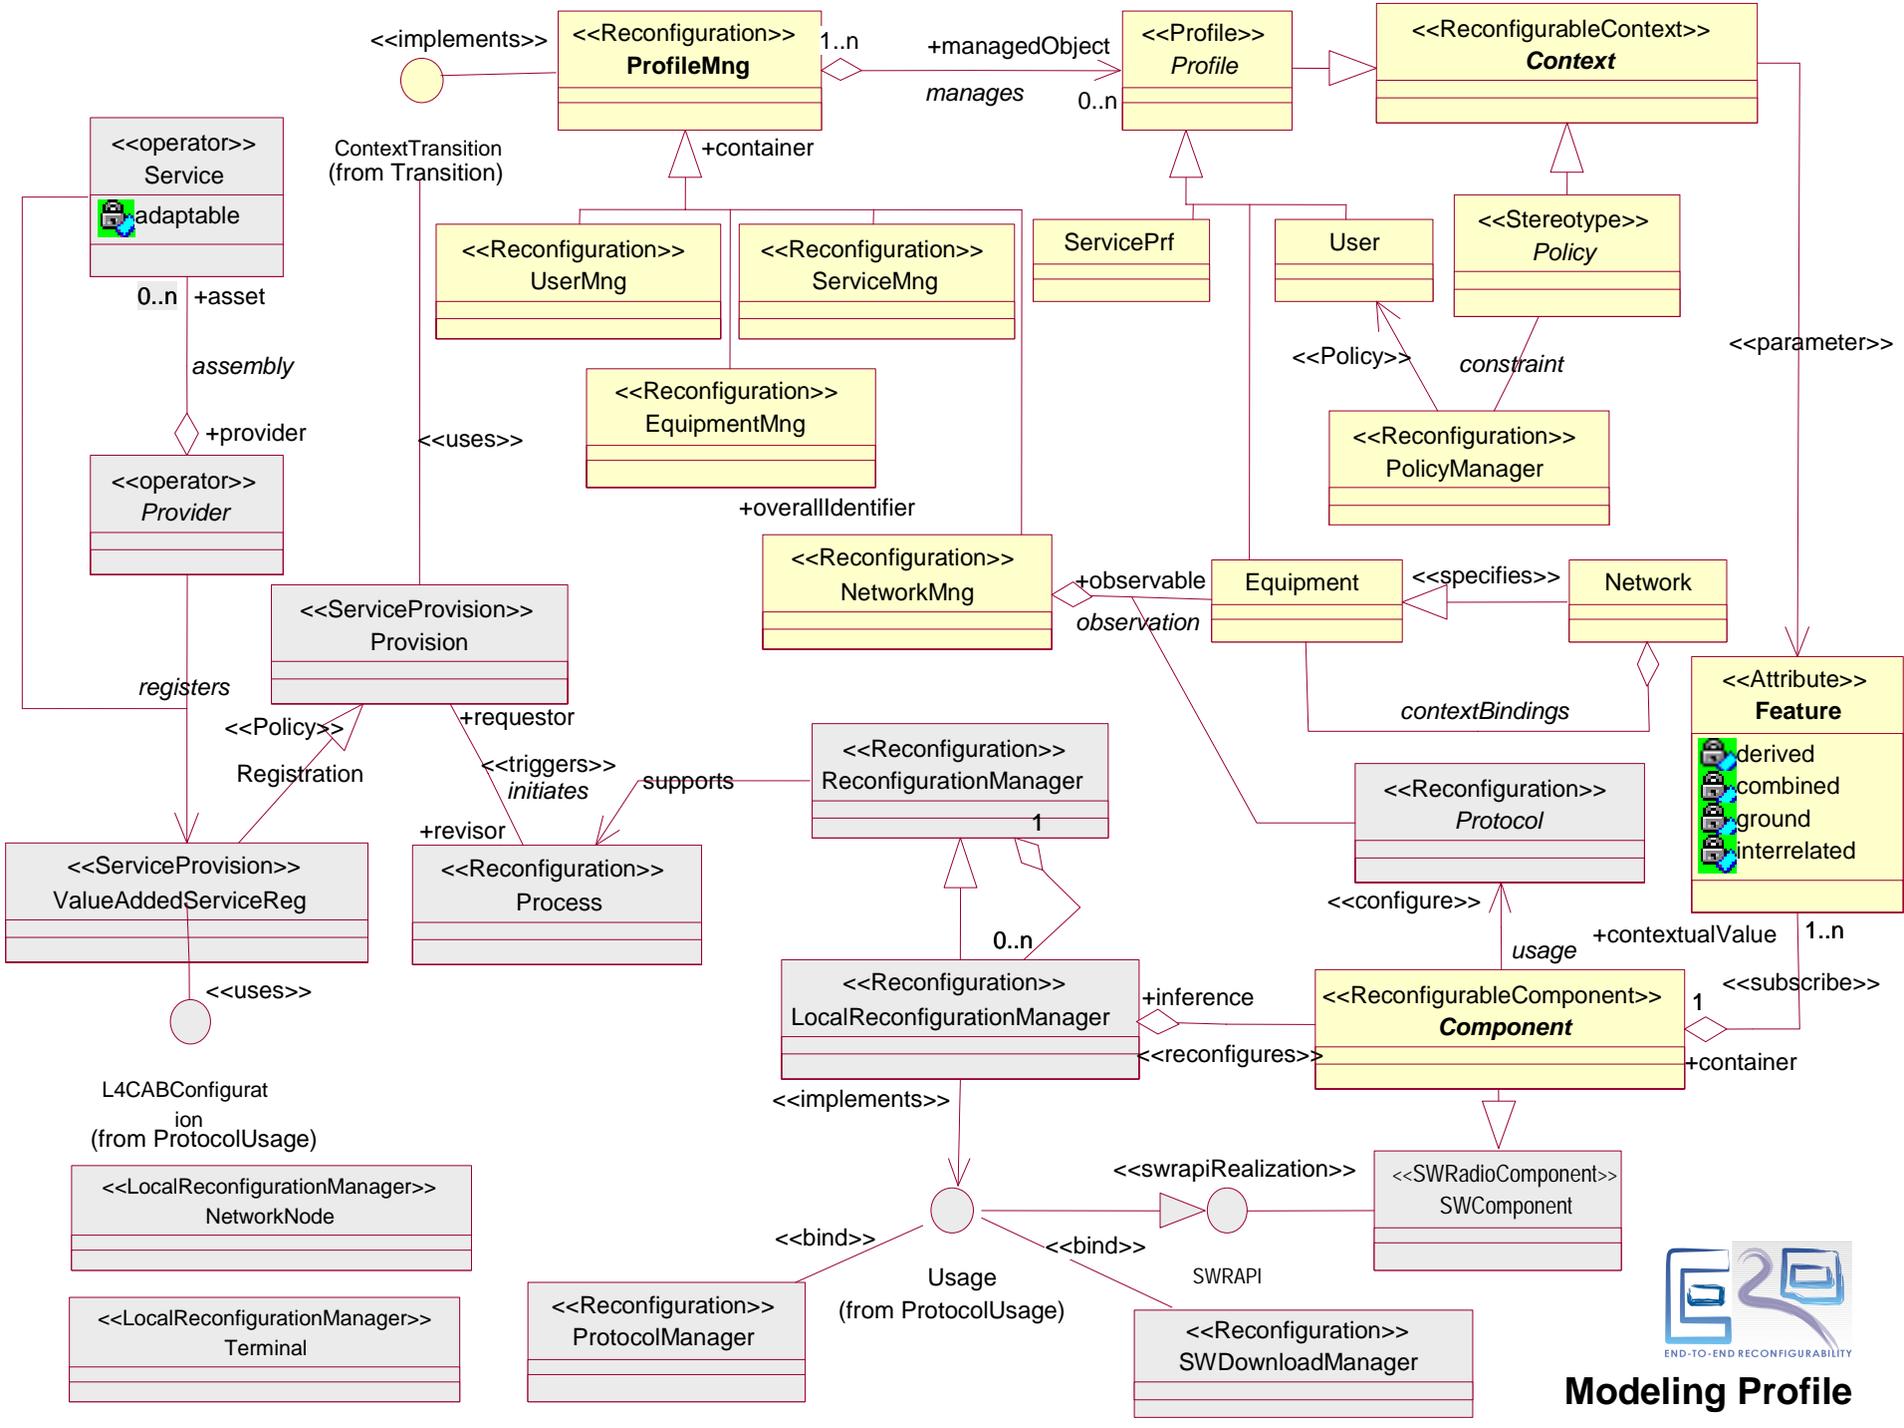

- Restriction policy for Service adaptation

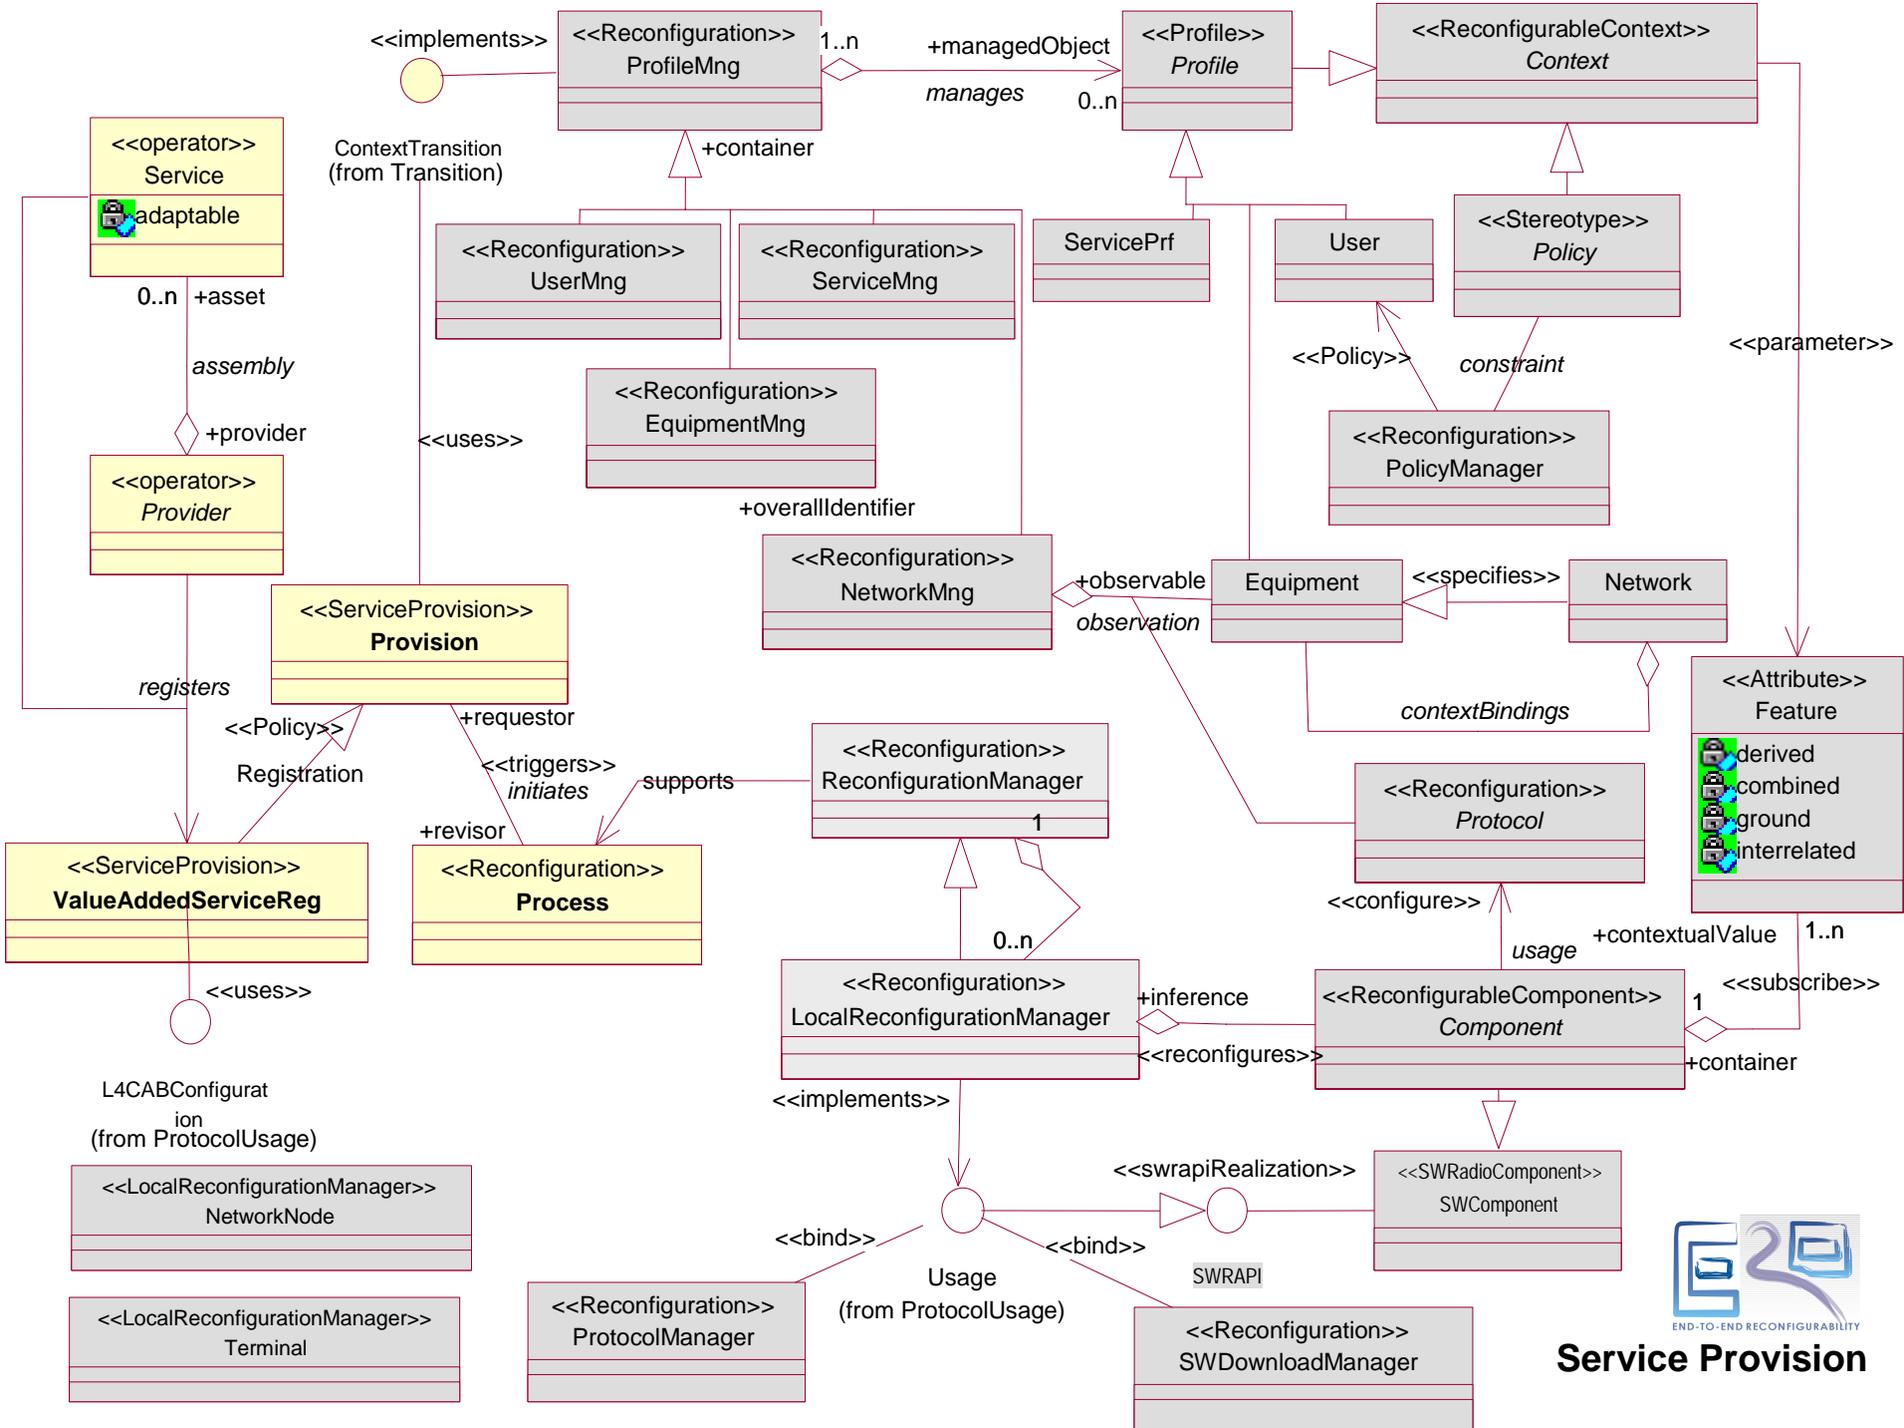

- Reconfiguration process
- Provision process

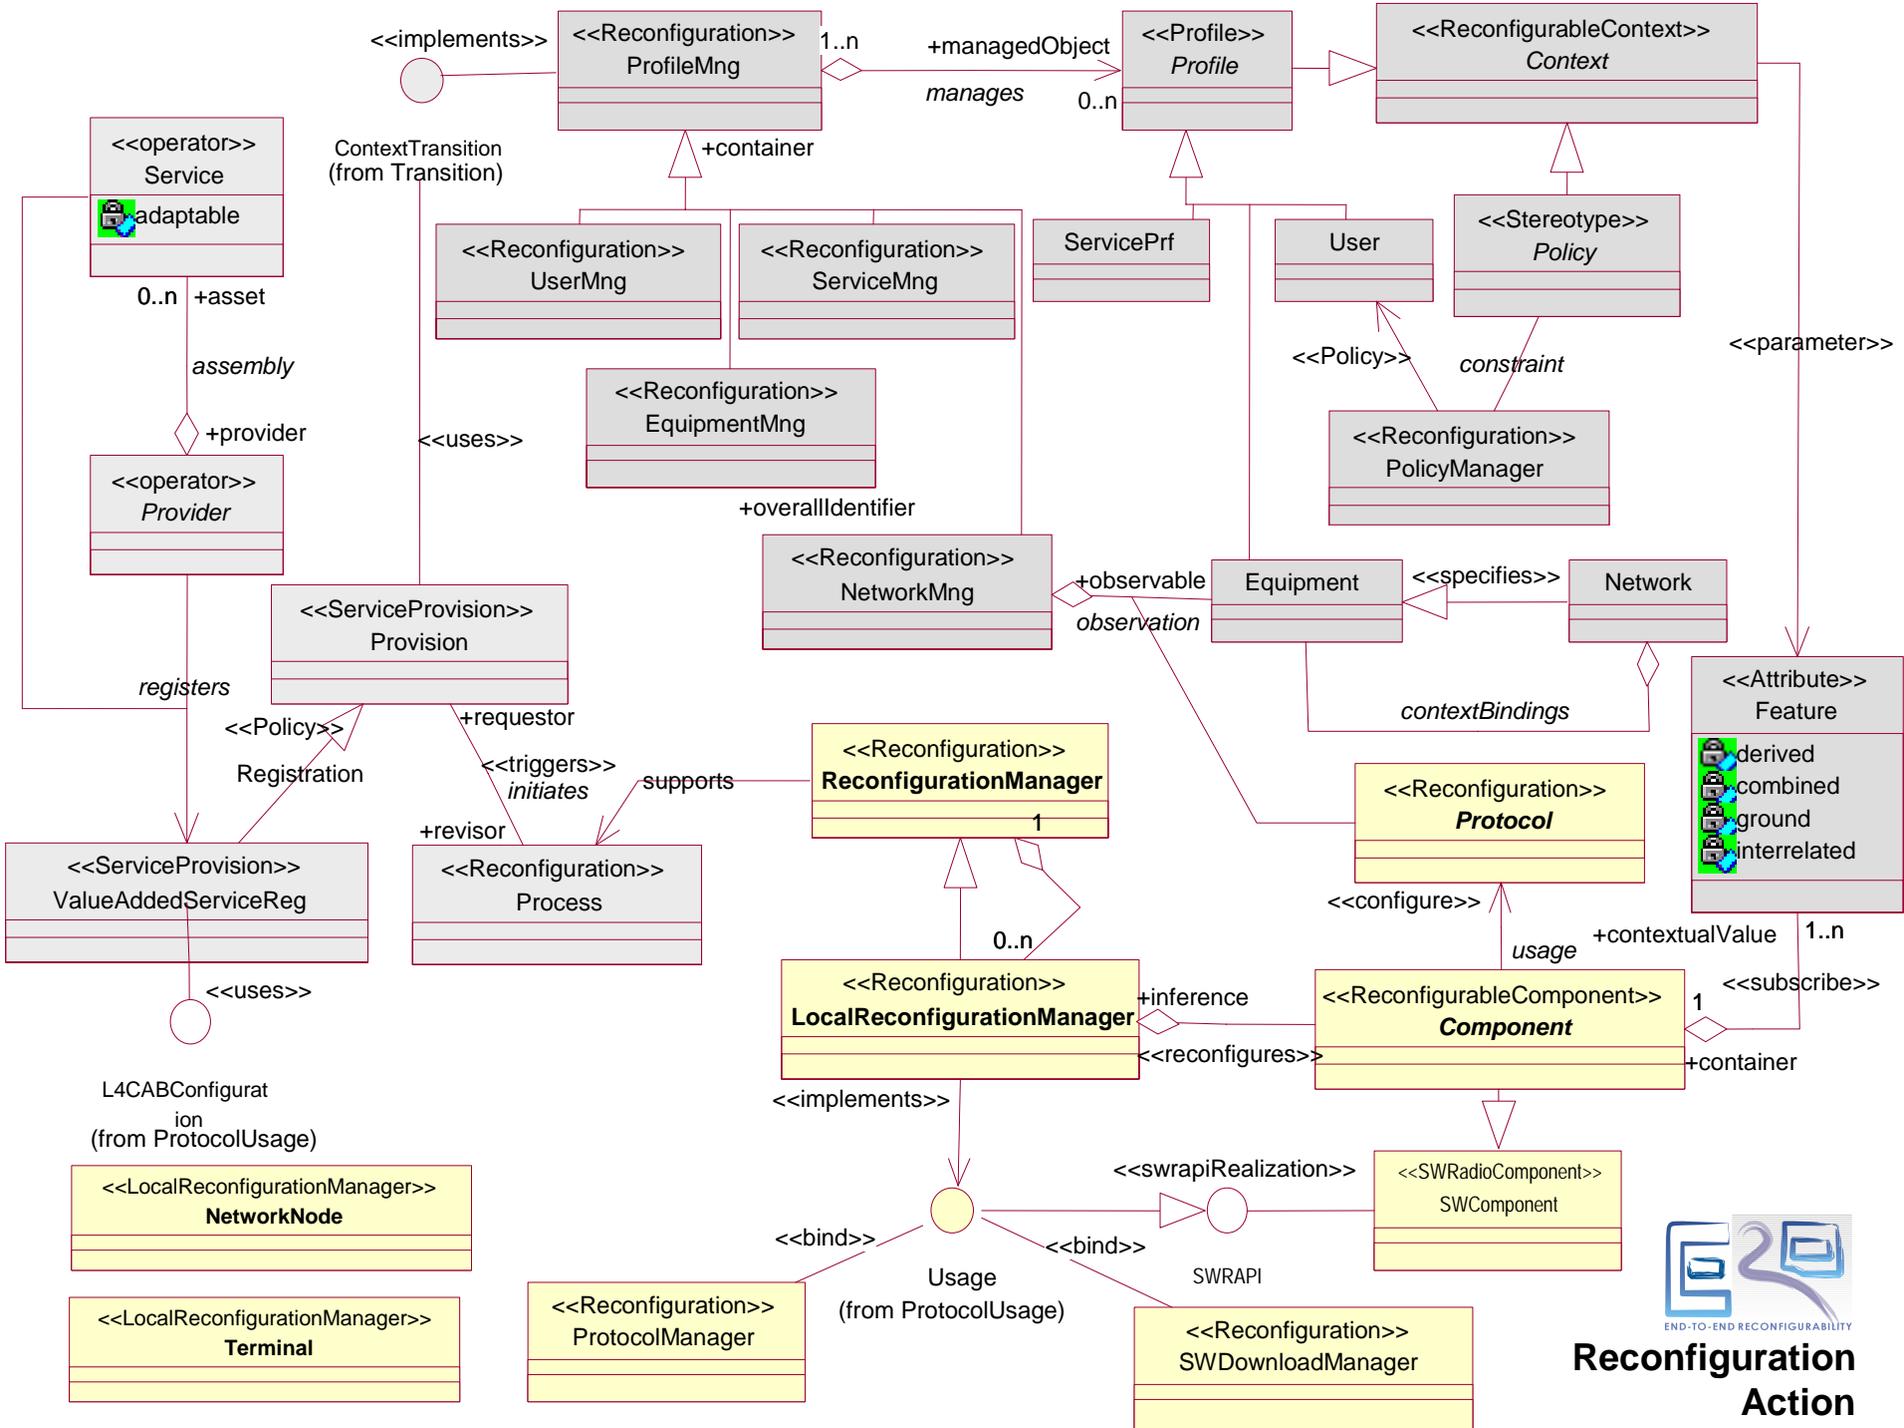

- Reconfiguration Classmark
- Reconfigurable Component

- Reconfiguration Manager
- Local Reconfiguration Manager

Service Provision

END-TO-END RECONFIGURABILITY

Reconfiguration Action

**THE END
THANK YOU**
