

Analysis and Design Platform Task Force Charter

January 12, 1996

Mission

- To enable developers to better understand how to develop applications (including large-scale distributed systems) using OT, thereby growing the market.
- To recommend technology for adoption to enable interoperability across the lifecycle of OA&D tools designs and work products
- To recommend technology for adoption to enable reuse of designs and work products developed using OA&D tools
- To recommend technology for adoption of common semantics, metamodel, and abstract syntax for OA&D methodologies
- To leverage existing OMG specifications
- To facilitate advances in the state of the art of OA&D methodologies
- To recommend liaison with other organizations
