35%	**Business Process Modeling with BPMN** All of the remaining **Business Process Model and Notation (BPMN) v2.0.2** elements and diagrams, except those events specifically excluded in the **Events Chart**. Also excluded are the transaction subprocess and transaction (ACID) semantics (although compensation is in scope), auditing and monitoring. Note that XMI is never included, and attributes are not covered unless specifically mentioned. For data handling, the exam will cover data object (including lifecycle and accessibility), data store, data input, and data output as elements of processes built from the business point of view, but not delve into inputSets, outputSets, or other (typically implementation-dependent) details of data handling. Consider global task and global process, handling events, complex gateway, compensation, conversations, choreography, execution semantics, error handling, and diagram interchange.
20%	**Business Process Management Knowledge and Skills** BP Project Management: Activity lifecycle and ownership of processes. Measurement and Optimization: CSFs and KPIs, Business Activity Monitoring (BAM), scorecarding, process simulation and optimization, BPM ROI, model value analysis, BPMS tool fundamentals, BPM Center of Excellence basics, and organizational change management.
15%	**Process Quality and Governance Frameworks** Process quality and governance frameworks: Questions on the intermediate exam go one level deeper into the scope, goals, and structure of these major frameworks: SOX, COBIT, and ITIL,OMG's **Business Process Maturity Model (BPMM) v1.0**, Six Sigma, and Lean especially as it relates to BPM.
10%	**Business Rules Approach and Shared Business-Wide Vocabulary** Noun concepts and Business Rules (BRs) vocabulary, BR basics, the two types of BR, and BR and business processes. Creating and using process-specific BRs, and the advantages of a shared business-wide vocabulary (SBVR Awareness).
10%	**Decision Management and Modeling with DMN** **Decision Model and Notation (DMN) v1.3** basic concepts, scope, uses, decision requirements,relating decision logic to decision requirements, decision tables, and relation of DMN to BPMN.
10%	**Intermediate Business Motivational Modeling** **Business Motivation Model (BMM) v1.3**: Chapters 7 (The Business Motivation Model) and 8 (The Core Elements of the Business Motivation Model). Includes referenced elements of business model defined externally: organization unit (in the BMM sense), business process, business rule, and constructing BMM models and interpreting (brief) scenarios.
