

SHOW WHAT YOU KNOW.

Why Should You Obtain an Object Management Group® (OMG®) Certification?

Certification helps employers evaluate potential new hires, analyze job performance, evaluate employees, and motivate staff to enhance their knowledge and skills. Certificate holders benefit by gaining recognition of their domain knowledge and skills, and proving that they are committed to their profession. Certification also helps with job advancement. Candidates' opt-in listing in OMG's on-line Certified Professionals Directory makes their certified status public.

Why Should You Become a Certified Expert in BPM (OCEB 2)?

- Credentials are important in the BPM world, where practitioners may work on many projects for different clients or employers over time.
- Designed by twenty-five experts from top BPM companies and well-known independent consultants, the OCEB program's topical coverage lets prospective employers feel confident about a certified candidate's ability to participate in or lead real-world initiatives in enterprise BPM.
- Your status as an OCEB 2 Certified Professional shows that you have required knowledge and skills, making you a more attractive candidate for hiring and promotion.
- OCEB 2 tests not only a candidate's knowledge of the domain's standards (such as BPMN™, BMM™, and BPMM™), but also aspects of the application of those standards in the field, and of industry best practices, over a wide range of process-related topics.

How to Register:

OMG Certification examinations are administered by OMG's testing partner, Pearson VUE. Pearson VUE offers exams through the world's largest network of test centers in 162 countries. To register for an OMG Certified Expert in BPM 2 exam, visit the OMG Exam Registration page at: <http://pearsonvue.com/omg>. For complete information on the OMG Certified Expert in BPM exams, visit www.omg.org/oceb-2. For questions, e-mail certificationinfo@omg.org.

View all OMG's certifications on UML, SysML, and Real-time and Embedded Systems: <http://www.omg.org/cert>.

OCEB 2 Exam Levels:

The OCEB™ program consists of five examinations, granting five Certifications. Above the single Fundamental level, the program splits into two tracks—one business-oriented, the other technically-oriented.

FUNDAMENTAL

A productive member ranked in the top half of his or her BPM project team should have the knowledge and skills to acquire this certification.

BUSINESS INTERMEDIATE

A BPM Team Lead on the business side, discovering, modeling, and analyzing business processes, should have the knowledge and skills to acquire this certification.

TECHNICAL INTERMEDIATE

A BPM implementation team lead, implementing and maintaining BPM systems, should have the knowledge and skills to acquire this certification.

BUSINESS ADVANCED

A BPM consultant to high-level management, or practitioner responsible for BPM scope and direction at Director level in an enterprise, should have the broad knowledge and skills covered in this certification.

TECHNICAL ADVANCED

A BPM consultant to high-level management working on the technical side, or BPM practitioner responsible for process performance and governance in an enterprise, should have the broad knowledge and skills covered in this certification.
