

# SHOW WHAT YOU KNOW.

## Certify Your Knowledge and Skills in UML® Software Modeling, BPMN™ Business Process Modeling, SysML® Systems Modeling, and Real-Time and Embedded Software Standards

### Why should you obtain an Object Management Group® (OMG®) Certification?

Certification helps employers evaluate potential new hires, analyze job performance, evaluate employees, and motivate staff to enhance their knowledge and skills. Certificate holders benefit by gaining recognition of their domain knowledge and skills, and proving that they are committed to their profession. Certification also helps with job advancement. Candidates opt-in listing to OMG's on-line Certified Professionals Directory makes their certified status public. OMG offers certification in the following four areas:

#### OMG Certified UML Professional 2™ (OCUP 2™)

The OCUP 2 program tests a candidate's knowledge and skills in the construction and interpretation of models using OMG's Unified Modeling Language™. There are three OCUP 2 exam levels: Foundation, Intermediate, and Advanced. Find detailed program information at [www.omg.org/ocup-2/](http://www.omg.org/ocup-2/).

#### OMG Certified Expert in BPM™ (OCEB 2™)

OCEB 2 tests a candidate's knowledge and skills in the areas of Business Process Management and Business Process Modeling, concentrating on OMG's BPMN 2. OCEB 2 consists of five examinations, granting five certifications. Above the single Fundamental level, the program splits into two tracks—business-oriented and technically-oriented. Find detailed program information at [www.omg.org/oceb-2/](http://www.omg.org/oceb-2/).

#### OMG Certified Real-Time and Embedded Specialist™ (OCRES™)

OCRES is a rigorous and comprehensive test of a person's knowledge of real-time and embedded systems software standards. The examinations test the candidate's knowledge of OMG's specifications for distributed real-time and embedded computing. Details at [www.omg.org/ocres/](http://www.omg.org/ocres/).

#### OMG Certified Systems Modeling Professional™ (OCSMP)

The OCSMP program certifies engineers in their use of SysML in model-based systems engineering. For their company, certified staff differentiates it in the marketplace when a customer considers awarding a contract. The OCSMP Model User level covers a wide range of essential MBSE and SysML knowledge and skills. Building on this foundation, three levels target model builders and advanced model users. For detailed program information, see [www.omg.org/ocsmp/](http://www.omg.org/ocsmp/).

#### How to Register

OMG Certification examinations are administered by OMG's testing partner, Pearson VUE, through the world's largest network of test centers in 175 countries. To register for an OMG certification exam, visit the OMG Exam Registration page at <http://pearsonvue.com/omg>. For complete information on any one of these programs, visit its website listed above.
