The MOD Group is a process solutions pioneer in the technology market. We've been helping companies achieve their goals and grow their businesses since 1973. During this time, ***The MOD Group***, with the parent company, Kendall and Davis, dedicated its mission to providing a repeatable 'best practices' solution approaches to our clients' business. Our reputation with our Fortune 500 customers rests on our ability to deliver and, in the process, build value with our customers that maintains our relationships over the decades.

Our Advantage

Two words - expertise and process. WE ARE MDA® IMPLEMENTATION SPECIALISTS. At ***The MOD Group***, we have a stellar combination of strategy, implementation, and process delivery professionals at your disposal. ***The MOD Group*** solutions are a sharing of goals, pure energy of thought and clarity of purpose. ***The MOD Group*** is an alchemy of art and science; concept and technique; left and right brain thinking. Our solutions enhance communications and build relationships, even within our very own customers' environments. Our blend of skills gives our clients a tangible competitive edge in their respective industries.

About The Process Solution – Model Process Framework (MPF^{TM})

The MOD Group utilizes a best practice approach called ***Model Process Framework^{TM}*** to utilize Model Driven Architecture from the Object Management Group. This approach is vendor agnostic and has been proven with Fortune 2000 companies. A forward thinking firm's staff can be up to speed with MDA® within 4 projects using a risk free incremental approach to MDA® inoculation, introduction, implementation, and transition. Value is achieved at every process stage and exit point, even if you do not adopt MDA® .
A simplified overview follows.....
Discover....
Understand the client problem and opportunities for business improvement or streamlining. From a multi-disciplinary point of view, extract core business solutions, and start aligning business practices with the strategic endeavor.
Define and Model....
During this phase, the team performs a deeper assessment and works with the business and IT units to put in place the processes and procedures for the client's success.
Conceptual Design....
Create the business conceptual "blueprints" for the solution with incorporating specific logic for your technology solution. During this phase, the team "fleshes out" the business solution concept, design, and vendor packages to meet the client's solution.
Business Detailed Design....
Create the detailed "blueprint" for the business solution.
In this phase, the MDA® Practitioners works along side the user, to transfer business knowledge and user experiences into the business model.
Implement....
In this phase, the MDA® Practitioners and client work with the generated architectural platform to add the 'detailing' of the business solution. This also includes testing and launching of the business process. The team also prepares for post implementation operational support following the approved warranty plan and the change management processes as well.

Partnerships and Alliances

The MOD Group works closely with a variety of companies that have shown commitment and value to both technology and the business solution industry. We believe in developing long-term relationships with companies that specialize in providing what our customers need, therefore we can offer the best solution available.
Our partners add value to our unique service by offering resources and like-minded thinking.
Implementing the latest in business solutions, business development, and creative direction, our alliances help us design and build the systems to create the most value for your business.
The MOD Group partners with only leading companies that can demonstrate expertise from the industry in which they specialize.

Why The MOD Group?

Offshore necessity eliminated, time critical projects delivered, vendor reliance eradicated, platform independence achieved are all immediate benefits. With the MOD Group value-added benefits using the MPF™ detailed above, include the knowledge transfer from our experienced staff. Other services include MDA® /UML® training, product evaluation assistance, workshops, project rehabilitation, and of course, MDA® and UML® practitioners to hire.   Remember, we **ARE** MDA® implementation experts.
