Dr. Richard Soley, Paul Harmon, and David Frankel
APRIL 2002 • SEATTLE, SAN DIEGO, DALLAS, CHICAGO, WASHINGTON DC
+1-781-444-0404 • www.omg.org/seminar

Cheap Application Insurance

The OMG Model Driven Architecture™

- Reduced cost throughout the application life-cycle
- Reduced development time for new applications
- Improved application quality
- Increased return on technology investments
- Rapid inclusion of emerging technology benefits into their existing systems

“This level of flexibility can also help ensure companies that they will be able to achieve their ROI goals with respect to their IT investments.”

MICHELE ROSEN / RESEARCH MANAGER / IDC

“Now, companies can look at MDA as a stable foundation for maximizing software value and longevity.”

GORDON BENETT / SENIOR ANALYST / ABERDEEN GROUP

MDA™ provides a solid framework that frees system infrastructures to evolve in response to a never-ending succession of software platforms, while preserving and leveraging existing technology investments. It enables system integration strategies that are better, faster and cheaper.
