

OMG-OCSMP-MBI300 Exam Overview

Exam Number	OMG-OCSMP-MBI300
Exam Duration	105 minutes in English-speaking countries (exception: city of Quebec) and 135 minutes in all others.
Exam Fee	US\$250 (or local equivalent) in English-speaking countries (exception: city of Quebec) and US\$260 (or local equivalent) in all others.
Exam Type	Multiple choice (text and SysML diagrams)
Exam Pass Score	>=55 of 90 questions answered correctly (>=61%)
Exam Prerequisite(s)	Passing scores on the OCSMP Model User and Model Builder Fundamental Exams.
Exam Specifications	Systems Modeling Language (SysML) v1.6 : Use solely as a reference.
Recommended Exam Study Guides	<p><i>A Practical Guide to SysML: The Systems Modeling Language, 3rd Edition (Friedenthal, Moore and Steiner)</i>: Chapters 4 (An Automobile Example Using the SysML Basic Feature Set) and 17 (Residential Security System Example Using the Object-Oriented Systems Engineering Method). All authors contributed to the SysML specification.</p> <p><i>Systems Engineering with SysML/UML: Modeling, Analysis, Design (Weilkiens)</i>: The author contributed to the SysML specification.</p>
Additional Reading	<p><i>MBSE Practices in Telescope Modeling (Weilkiens)</i></p> <p><i>Cookbook for MBSE with SysML</i>: Use solely as a reference.</p> <p><i>Survey of Model-Based Systems Engineering (MBSE) Methodologies (Estefan)</i>: Chapter 2 (Differentiating Methodologies from Processes, Methods, and Lifecycle Models)</p> <p><i>Systems Engineering Best Practices with the Rational Solution for Systems and Software Engineering (Hoffmann)</i></p> <p><i>The OMG SysML Tutorial</i></p> <p><i>Simulation-Based Design Using SysML: Part 1: A Parametrics Primer (Peak)</i>: Four authors contributed to generating this exam.</p> <p><i>OMG SysML Website</i></p> <p><i>Hybrid SUV Example (SysML v1.2)</i></p> <p><i>SysML Notations and Conventions</i></p>
Exam Training Options (not required)	Mithun (Netherlands: 4-day course)
Exam Voucher Program	Visit the Pearson VUE Voucher Store for a 10% discount/10 vouchers or contact certificationinfo@omg.org or call +1-781-444-0404 Ext. 144 for a 15% discount/25 vouchers, a 20% discount/50 vouchers and a 25% discount/100+ vouchers. Vouchers can be transferred. Vouchers expire one year after purchase. Contact Pearson VUE to honor a previously purchased voucher price.
Exam Registration	Pearson VUE : create an account, locate a test center, view available tests, (re)schedule a test (online or at a test center), cancel your exam (contact Pearson VUE >=24 hours prior to exam for a full refund or you forfeit the full exam price), view exam scores and Contact Pearson VUE .
Testing Accommodations	If you have a hearing, learning, physical or visual disability you may contact us at certificationinfo@omg.org to provide instructions on testing accommodations.
Online Exam Check-In & Requirements	Visit Pearson VUE Online Proctoring for detailed info. Log in at least 30 minutes early (online verification may take 15-20 minutes). Late arrivals will not be allowed to take the exam.
Test Center Check-In & Requirements	Arrive at least 30 minutes early. Late arrivals will not be allowed to take the exam. Two forms of ID (at least one with photo and both with signature): alien registration card, bank card, credit card, employee badge, government issued, green card, military, passport, school and state ID. Do not bring any items (personal or otherwise) other than the two forms of ID to a test center. Pearson VUE Test Center Coronavirus Guidelines
Exam Languages	Offered in English. You cannot use a translating app during the exam.

Review Your Answers	Before completing the exam you will be presented with a review screen to review your answers to all questions.
Exam Score Reports	Pass or fail, you will be provided with a score report on computer screen immediately following the exam whether on-site at test center or online. A hardcopy will be provided to you before leaving test center with your score in each major section. If you fail, you can review those sections where you scored poorly to assist you when you decide to retake the exam. You can also review your exam scores via your Pearson VUE account .
Certification Kit	Those who pass the exam will receive a certification kit within 4-6 weeks of taking the exam. The kit will include a certification letter, certificate, digital certification logo download instructions, guidelines and how to opt-into the OMG Certified Professionals Directory . Certifications are associated with individuals and not companies.
Lost Certificate	Contact certificationinfo@omg.org with your full name, mailing address and candidate ID number. Shipping costs will apply.
Updating Contact Information	You must first update your contact information via your Pearson VUE account and then contact certificationinfo@omg.org to update the OMG Certified Professionals Directory .
Certification Expiration	Your certification expires 5 years from the date you passed the exam. The same or a higher-level certification must be taken prior to the expiration date to extend a certification by 5 years.
Retaking the Exam	You can retake the exam 30 days after you last took the exam. However, an exam cannot be retaken more than 3 times within a 12-month period. The cost of a retaken exam is US\$175 (or local equivalent) in English-speaking countries (exception: city of Quebec) and US\$185 (or local equivalent) in all others. Contact Pearson VUE to request the exam retake discount.
Still Have Questions?	certificationinfo@omg.org

General Areas Tested in OMG-OCSMP-MBI300 Exam

MODEL CONCEPTS	
Modeling guidelines and Practices Application of modeling guidelines and practices.	6%
ORGANIZING A SYSTEM MODEL USING THE FULL SET OF SYSML CONSTRUCTS	
Building A Package Diagram Using the Full Set of SysML Constructs Package and element import, defining and using view and viewpoint, building and using model libraries, as well as awareness of assessment criteria (e.g., structured queries) and activities.	6%
BUILDING A REQUIREMENTS MODEL USING THE FULL SET OF SYSML CONSTRUCTS	
Building A Requirements Diagram Using the Full Set of SysML Constructs Specialized requirements (SysML Annex C: functional, interface, performance, physical and design constraints), establishing requirements traceability (derive, verify, satisfy, refine, trace and containment), tracing requirements in tables and matrixes, representing verification and testing, test context as well as test case.	10%
Building A Use Case Model Using the Full Set of SysML Constructs Relating use cases to behavioral models - activity diagrams and state machines, and relating use cases to requirements.	
BUILDING A STRUCTURAL MODEL USING THE FULL SET OF SYSML CONSTRUCTS	
Building the Block Definition Diagram Adding Block Features: Receptions, ordered and unique collections, read only properties, property redefinition, constraint (reference to parametrics below), distributed properties. Block Relationships: Shared vs composite aggregation (white vs black diamond), association blocks and generalization sets. Value Types: Enumerations, structured value types ("position vector" with XYZ structure). Blocks and Behavior: Classifier behavior (See Friedenthal), owned behaviors, activity hierarchies on bdds. Defining instances.	29%

<p>Building the Internal Block Diagram Block Properties: Creating a property specific type and notation for part multiplicities on ibd's. Ports: Flow Ports: Flow specifications and properties, conjugated ports, and compatibility rules including item flows and ports. Standard Ports: Defining required and provided interfaces, typing a port with required and provided interfaces (i.e., with a provided interface and with a classifier with use/realize relationship). Port delegation (for both flow ports and standard ports). Connectors: Nested connector ends, item flows/item properties, conveyed classifiers, typing item properties, ownership of item properties, and connector properties.</p>	
BUILDING A PARAMETRIC MODEL USING THE FULL SET OF SYSML CONSTRUCTS	
<p>How To Use Constraints in SysML to Model System Analyses Defining Constraints on A Block Definition Diagram Using the Full SysML Feature Set Nesting of constraints, trade study support (Annex E.4), measures of effectiveness, objective functions, alternatives, and constraining flows.</p>	11%
BUILDING A BEHAVIORAL MODEL USING THE FULL SET OF SYSML CONSTRUCTS	
<p>How To Use SysML to Model System Behavior Building An Activity Diagram Using the Full Set of SysML Constructs I/O Flow: Optional vs. required, streaming, rates (continuous and discrete), no buffer, overwrite, token ordering (FIFO, LIFO, etc.), data store/central buffer, object node state, parameter set, and probabilities. Control Flow: Control Operators: Flow final, and advanced control operations (decision input/ join specification). Control pins and interruptible regions. Actions: Primitive actions. Constraints: Pre/post conditions and defining properties on activities.</p> <p>Building A Sequence Diagram Using the Full Set of SysML Constructs Messages, Lifelines: Selectors, lifeline decomposition and activations (including nested). Interaction Operators: Advanced interaction operators, combining interaction operators and nesting interaction operators. Interaction Decomposition: Interaction use or references and gates. Constraints: Observations and timing constraints and state invariants.</p> <p>Building A State Machine Diagram Using the Full Set of SysML Constructs Understanding that a SM represents the states of a block (Friedenthal). Transitions: Graphical transition notation, internal transitions and deferred events. State Hierarchy: Composite states and orthogonal composite states. Pseudo States: Junction state, choice, history states - shallow, deep, fork and join, entry and exit points, and terminate nodes. Nested State Machines: Submachine states. Connection points.</p>	33%
DEFINING STEREOTYPES, PROPERTIES, AND CONSTRAINTS (EXTENSION, SUBCLASS)	
Total	100%
