

OBJECT MANAGEMENT GROUP®

OMG Past – And SDA Future?

Richard Mark Soley, Ph.D.

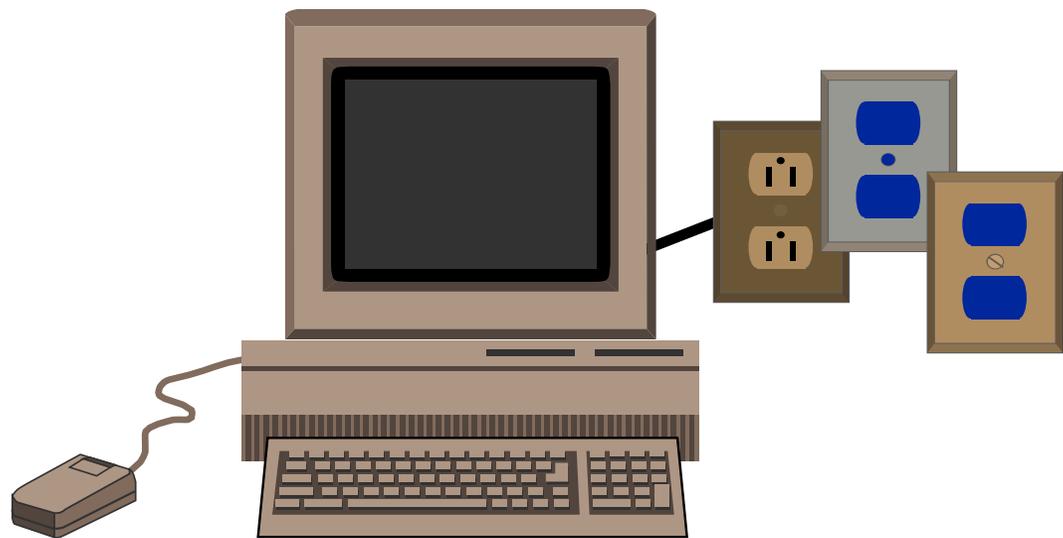

Chairman and CEO

23 May 2017

No Magic World Conference 2017

OBJECT MANAGEMENT GROUP[®]

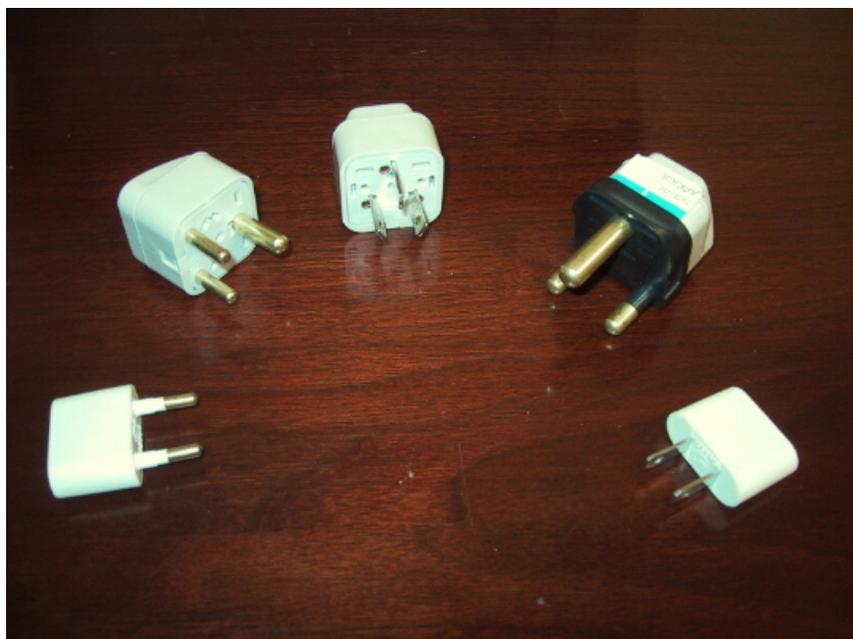

OMG VISION

The Global Information
Appliance

OBJECT MANAGEMENT GROUP[®]

OMG VISION

N+1 is the Wrong Solution

OBJECT MANAGEMENT GROUP[®]

OMG'S MISSION

- Focused on rapidly developing markets based on open, international, rapidly-developed standards
- Develop an architecture, using appropriate technology, for modeling & distributed application integration, guaranteeing:
 - reusability of components
 - interoperability & portability
 - basis in commercially available software
- Specifications freely available
- Implementations exist
- Member-controlled not-for-profit

OBJECT MANAGEMENT GROUP[®]

OMG'S FOCUS

- Three key “infrastructure” standards foci:
 - Modeling
 - Middleware
 - Real-time & other specialized systems
- More than 20 “vertical market” foci:
 - Civil & Military Government
 - Financial Services
 - Healthcare
 - etc.
- Focused working groups
 - Business Architecture
 - Cloud Computing
 - Software Quality Initiative

SOME OF OUR STANDARDS DOMAINS

1989-04: Official founding of the organization: Click & Drag???

1989-10: First open, organized meeting (Austin Texas); meeting cadence 8 times per year

1989-11: First draft policies & procedures presented

1989-12: Initial policies & procedures adopted

1990-04: Meeting cadence 6 times per year

1990-06: First Object World (San Francisco, CA)

1990-08: First RFI Responses

1990-09: Object Management Architecture published

1990-12: First RFP Responses (ORB, not ORM: APM, Bull, HyperDesk, Digital, HP, Sun Microsystems, NCR, Object Design)

1991-06: ORB joint working group created (HyperDesk, Digital, HP, Sun Microsystems, NCR, Object Design)

1991-08: Merged joint draft CORBA specification presented

1991-10: CORBA 1.0 specification published

1996-01: Initial discussion of methodologists to create modeling notation standard (Santa Clara, CA)

1996-05: Object World Corporation sold to Softbank COMDEX

1996-08: CORBA 2.0 specification published

1997-09: Richard Soley named Chairman and CEO; Bill Hoffman named President and COO

1997-09: UML 1.1 specification published (there never was a 1.0)

1997-09: Verticalization strategy begins (healthcare, finance, manufacturing, telecommunications)

2000-11: Launch of Model Driven Architecture

2002-07: CORBA 3.0 specification published

2005-07: UML 2.0 specification published

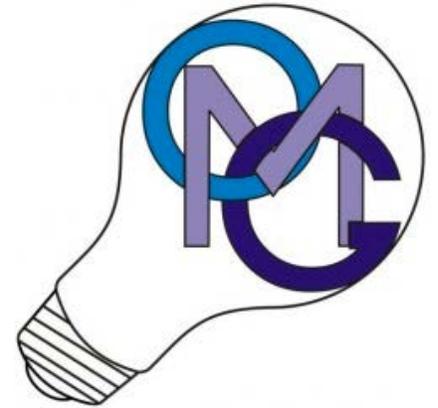

2006-12: Meeting cadence 4 times per year

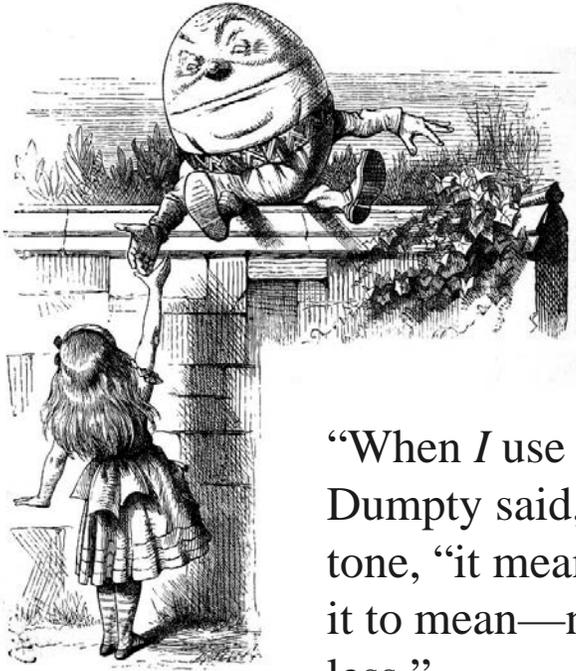

2007-01: Launch of SOA Alliance (then BPM Consortium, GCIO, Business Ecology)

2014-03: Launch of Industrial Internet Consortium (joining CSCC, CISQ)

TIMELINE

“When *I* use a word,” Humpty Dumpty said, in rather a scornful tone, “it means just what I choose it to mean—neither more nor less.”

“The question is,” said Alice, “whether you *can* make words mean so many different things.”

“The question is,” said Humpty Dumpty, “which is to be master—that's all.”

What Does it Mean?

9 September 1917 letter from Admiral John Arbuthnot Fisher to the First Lord of the Admiralty (*that would be Winston Churchill*)

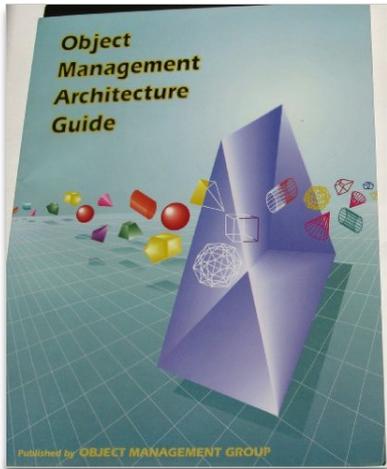

OMG! OMG!

“I hear that a new order of Knighthood is on the tapis -- O.M.G (Oh! My! God!) Shower it on the Admiralty!!”

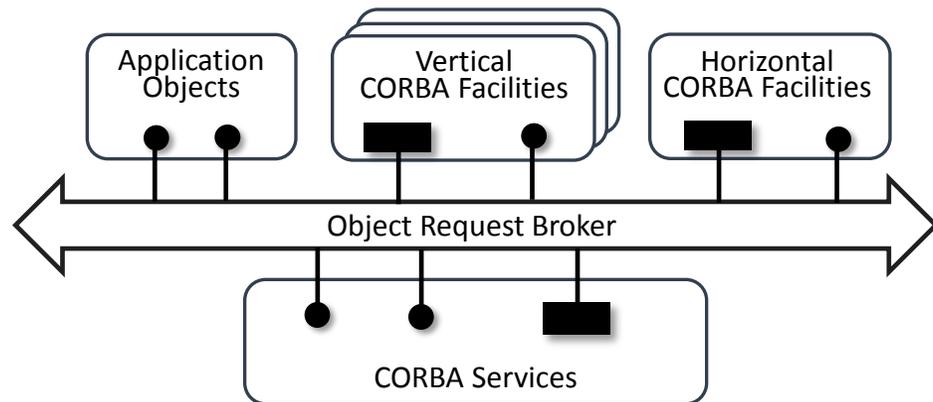

1989-04: Official founding of the organization
1989-10: First open, organized meeting (Austin Texas); meeting cadence 8 times per year
1989-11: First draft policies & procedures presented
1989-12: Initial policies & procedures adopted
1990-04: Meeting cadence 6 times per year
1990-06: First Object World (San Francisco, CA)
1990-08: First RFI Responses
1990-09: Object Management Architecture published
1990-12: First RFP Responses (ORB, not ORM: APM, Bull, HyperDesk, Digital, HP, Sun Microsystems, NCR, Object Design)
1991-06: ORB joint working group created (HyperDesk, Digital, HP, Sun Microsystems, NCR, Object Design)
1991-08: Merged joint draft CORBA specification presented
1991-10: CORBA 1.0 specification published
1996-01: Initial discussion of methodologists to create modeling notation standard (Santa Clara, CA)
1996-05: Object World Corporation sold to Softbank COMDEX
1996-08: CORBA 2.0 specification published
1997-09: Richard Soley named Chairman and CEO; Bill Hoffman named President and COO
1997-09: UML 1.1 specification published (there never was a 1.0)
1997-09: Verticalization strategy begins (healthcare, finance, manufacturing, telecommunications)
2000-11: Launch of Model Driven Architecture
2002-07: CORBA 3.0 specification published
2005-07: UML 2.0 specification published
2006-12: Meeting cadence 4 times per year
2007-01: Launch of SOA Alliance (then BPM Consortium, GCIO, Business Ecology)
2014-03: Launch of Industrial Internet Consortium (joining CSCC, CISQ)

TIMELINE

ORB OR ORM ?

1989-04: Official founding of the organization
1989-10: First open, organized meeting (Austin Texas); meeting cadence 8 times per year
1989-11: First draft policies & procedures presented
1989-12: Initial policies & procedures adopted
1990-04: Meeting cadence 6 times per year

2014-03: Launch of Industrial Internet Consortium (joining CSCC, CISQ)

TIMELINE

OBJECT MANAGEMENT GROUP[®]

REQUEST BROKER

- RFI (Request for Information) period closed August 15, 1990 with 8 responses.
- RFP (Request for Proposals) period closed December 31, 1990; 10 Letters of Intent.
- Seven proposals presented March 1991: APM, Bull, Digital, DSET, HP/Sun, HyperDesk, & NCR/ODI.
- Field narrowed to two (HyperDEC & HP/Sun/NCR/ODI for May 15 demos.
- Merged proposals presented September 1991.
- Proposal accepted October 1991.

What Does it Mean?

1989-04: Official founding of the organization

1991-08: Merged joint draft CORBA specification presented
1991-10: CORBA 1.0 specification published
1996-01: Initial discussion of methodologists to create modeling notation standard (Santa Clara, CA)
1996-05: Object World Corporation sold to Softbank COMDEX
1996-08: CORBA 2.0 specification published
1997-09: Richard Soley named Chairman and CEO; Bill Hoffman named President and COO
1997-09: UML 1.1 specification published (there never was a 1.0)
1997-09: Verticalization strategy begins (healthcare, finance, manufacturing, telecommunications)
2000-11: Launch of Model Driven Architecture
2002-07: CORBA 3.0 specification published
2005-07: UML 2.0 specification published
2006-12: Meeting cadence 4 times per year
2007-01: Launch of SOA Alliance (then BPM Consortium, GCIO, Business Ecology)
2014-03: Launch of Industrial Internet Consortium (joining CSCC, CISQ)

TIMELINE

OBJECT MANAGEMENT GROUP[®]

CORBA como un estándar para objetos distribuidos

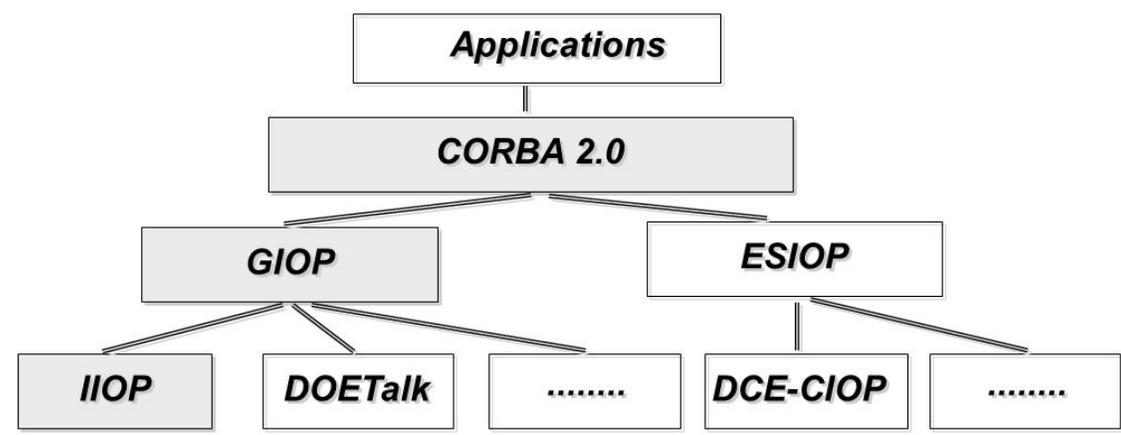

- CORBA 2.0 añade interoperabilidad como una meta en la especificación.
- En particular, CORBA 2.0 define un protocolo de red, llamado IIOP (Internet Inter-ORB Protocol), que permite a los clientes usar un producto CORBA de cualquier vendedor para comunicarse con objetos usando un producto CORBA de cualquier otro vendedor.
- IIOP funciona a través de Internet, o más precisamente, a través de cualquier implementación.

CORBA INTEROPERABILITY

OBJECT MANAGEMENT GROUP[®]

OK, CORBA INTEROPERABILITY

 *Mandatory: provides "out of the box" interoperability*

OBJECT MANAGEMENT GROUP[®]

DON'T FORGET DDS

- The Data Distribution Service is highly successful
 - 1.0 version came out June 2003
 - Currently on 1.4
- Found in finance, healthcare, weapon systems, command & control, communications, ...
- Uses CORBA's IDL and on-the-wire format CDR!

TIMELINE

OBJECT MANAGEMENT GROUP[®]

IT'S A REVOLUTION!

MODELING CHANGES EVERYTHING!

- Throw out those pesky objects!
- Toss away your silly compilers!
- No more boring coding!
- All your software pain gone forever!

OBJECT MANAGEMENT GROUP®

EVERYTHING OLD IS NEW AGAIN

- Unfortunately I'm old enough to remember
 - Artificial Intelligence
 - Object Technology
 - Distributed Computing
 - XML
 - Web Services
 - Enterprise Service Bus
 - Service Oriented Architecture
 - Cloud Computing & Virtualization
- This technology does everything! It makes miracles, changes water to wine...

OBJECT MANAGEMENT GROUP®

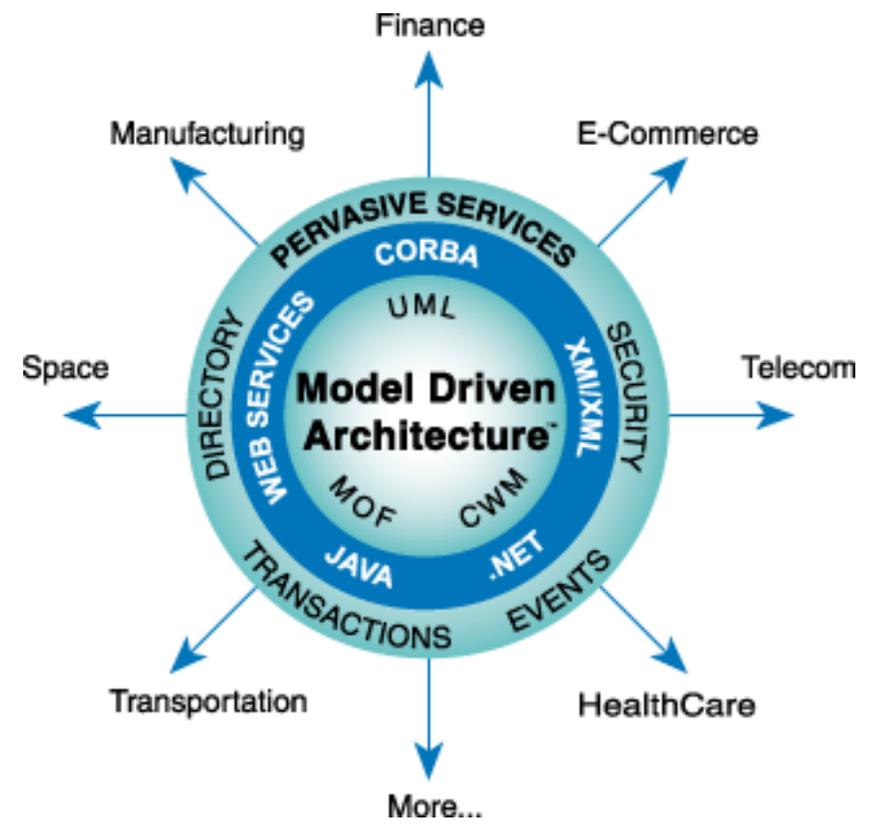

MOVE TO MODEL DRIVEN EVERYTHING!

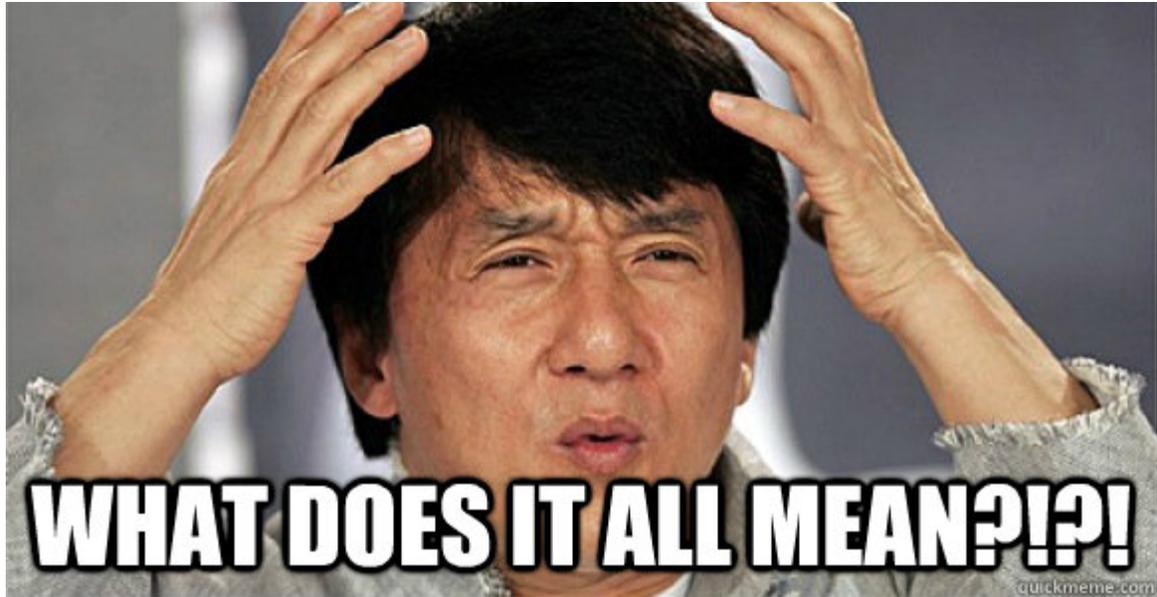

That's a model, driving, get it?

OBJECT MANAGEMENT GROUP®

WAS IDL THE POOR MAN'S UML?

What Does it Mean?

1989-04: Official founding of the organization

TIMELINE

OMG IS ABOUT
COMMUNITIES

OBJECT MANAGEMENT GROUP[®]

OMG IS ABOUT
COMMUNITIES

"We don't have many standards and we don't know what standards we want."

"But we know we want them!"

INDUSTRIAL INTERNET STANDARDS

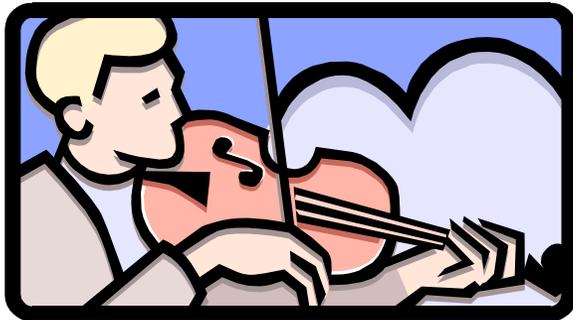

Standards are the most important enabler for innovation in the world today.

- **Terminology**
 - “Industrial Internet” vs. “Cyber-Physical Systems” vs. “Internet of Things” vs. “Machine-to-Machine”
- **Middleware**
 - There will be many connection regimes with different requirements (transactional, performance, connectedness, reliability, etc.): but DDS is key
- **Modeling (well, that’s obvious) & *Semantics***
- **Vertical markets**
 - Energy, Transportation, Communications, etc. etc.

**WHERE ARE THE
STANDARDS
OPPORTUNITIES?**

- **At the bottom of the stack**
 - Data Distribution Service (DDS)
- **In the middle of the stack**
 - Dependability assurance framework
 - Threat modeling
 - Structured assurance case metamodel
 - Unified component model for embedded
- **At the critical top of the stack**
 - Vertical markets: oil & gas, healthcare, finance, etc.
 - Semantics/ontology: definition, translation, integration

WHERE DOES OMG PLAY?

OBJECT MANAGEMENT GROUP[®]

- These are large, complex systems of systems
- Nothing works better for large, complex systems of systems than modeling
- Languages like UML (for software), SysML (for complex systems), BPMN (for business processes) will be core to designing Industrial Internet systems
- You hold the key!

MODELING IS THE CORE

What Does it Mean?

The Meaning Of Semantics

se·man·tics

/sə'man(t)iks/

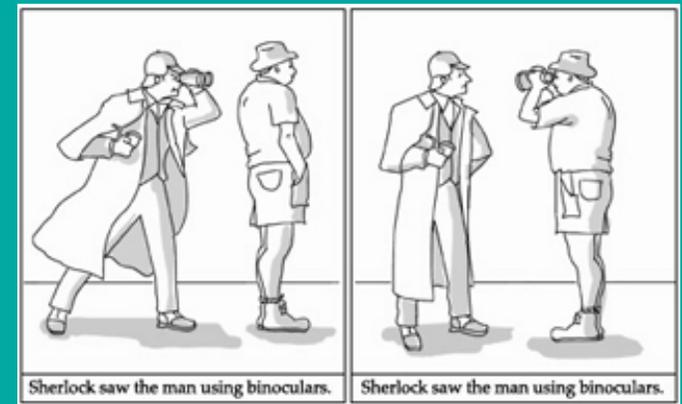

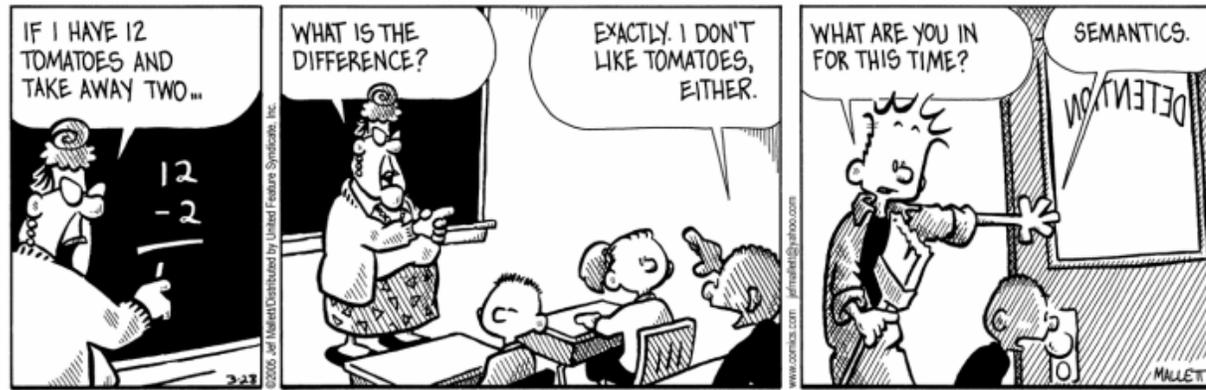

noun

the branch of linguistics and logic concerned with meaning. There are a number of branches and subbranches of semantics, including *formal semantics*, which studies the logical aspects of meaning, such as sense, reference, implication, and logical form, *lexical semantics*, which studies word meanings and word relations, and *conceptual semantics*, which studies the cognitive structure of meaning.

- the meaning of a word, phrase, sentence, or text.
plural noun: **semantics**
"such quibbling over semantics may seem petty stuff"

The Industrial Internet of Things

Comprises many different requirements:

- Middleware (communications)
- Sensor fusion
- Realtime data analysis
- Delivery of results to decision-makers
- ...or real-world actuation.

Modeling Languages

- **Modeling becomes more important than ever; we have to be able to model semantics at every level**
 - We will depend more than ever on the common modeling core, MOF
- **We will increase our focus on vertical markets**
 - **Already 85% share of standards processes; likely to increase**
 - **We are already defining semantics in verticals**
 - Languages
 - Protocols
 - API's
- **Our semantics activities take on a much higher level of importance**

Whither MDA?

- Looking at our highest priorities right now, semantics represents our biggest problem *and biggest opportunity*
 - Industrial Internet of Things
 - Business Architecture and Modeling
 - Systems Modeling Environment
 - Sovereignty & Security
- We already have the strongest possible base for a new focus
 - Robust middleware
 - Powerful and broad family of modeling languages
 - Large and growing collection of vertical market standards from software communications to financial services

Semantics Focus
